

The SH 600/660 Series

NEW CONSTRUCTION WINDOW A PREMIUM, WELDED SINGLE HUNG OF EXQUISITE, CONTEMPORARY DESIGN

STANDARD FEATURES

An ideal new construction window, the SH 600/660 Series can be configured to fit virtually any design need: single-hung, 2-lite slider, 3-lite slider, picture window, and architectural shapes.

- A. Fusion-welded frame and sash for superior strength.
- B. "Warm edge" Swiggle Seal glass sealant provides greater insulation of glass edges.
- C. Aluminum screen to retain taut shape.
- D. Multi-chambered construction in frame and sash provides greater strength, higher insulation value, and reduced noise for quiet comfort.
- E. Double weather-stripped integral interlock for extra protection against drafts.
- F. Exquisite, open, contemporary design affords greater visible glass area for enhanced appearance and better viewing.
- G. Bottom sash tilts in for easy cleaning.
- H. True sloped sill or pocket sill are available on single hung for positive water-drainage.
- I. Double pane insulated glass for energy savings and year-round comfort.
- J. Elegant soft bevel on exterior frame.
- K. A sleek, contoured sash lock, together with low profile tilt latches, replace "meeting rail clutter" with understated elegance.

AVAILABLE OPTIONS

- L. High performance Low E glass.
- M. Argon gas-filled insulated glass.
- N. Obscure glass.
- O. Oriel construction to meet design needs.
- P. Several grid options, including diamond.
- Q. Integral nailing fin and J channel.
- R. Zero degree mullion for easy multi-window installation.
